## Welcome introduction from the Course Convenor & Director

A warm welcome to the annual K.EN.T Endo-surgical Course 2022 a 3-day course which is taking place in Discovery Park, Sandwich, Kent on the 4th and 5th of October 2022, now in its 6th successful year. The hands-on training day will be held in the academic premises of Cambridge University on the 6th of October 2022.

This course has become an extremely popular and prestigious event amongst our UK gastroenterologists and surgeons, and has gone from strength-to-strength over the last 5 years. It is the only endoscopy-surgical training course dedicated to complex colorectal and oesophageal procedures (EMR, ESD/SSD, SCOPE, POEM, G-POEM, Z-POEM, STER, TAMIS), comprising sections with live lectures, live endoscopy cases and hands-on experience.

Our international faculty provides experience and insight of real-time endoluminal therapy, offering our worldwide delegates a sound understanding of technique and practice.

The internationally recognised faculty will again join our prestigious well-respected UK national faculty, and we look to surpass all expectations and hence establish a unique National and International training course.

This year, the K.EN.T Endo-surgical Course 2022 (4th and 5th of October 2022) will advocate an Immersive-Hybrid event (FIRST OF ITS KIND IN ENDOSCOPY IN UK) offering two separate platforms for delegates to join: (a) physical attendance/F2F access with a Virtual Reality experience, (b) the remote live streaming platform. This is an innovation in the field of endo-surgery training. Additionally, we will incorporate face-to-face training with hands-on experience on the 6th of October 2022, the ONLY training course which offers delegates a unique and fascinating experience.
